CHIEF EXECUTIVE OFFICER

### SHANFARI & PARTNERS CO. LLC

#### OCCUPATIONAL HEALTH SAFETY & ENVIRONMENT POLICY

#### Obligations:

Shanfari & Partners Co. LLC, Management is firmly committed to a policy enabling all work activities to be carried out safely, and with all measures taken to remove risks to the health, safety and welfare of workers, contractors, authorised visitors and anyone else who may be affected by the operations. We are committed to comply with the Laws & Regulation in relation with Occupational Health, Safety & Environment and other laws as governed in the Sultanate of Oman.

#### Management Commitment:

- A safe working environment
- Safe systems of work
- · Plant and substances in safe condition
- · Facilities for the welfare of workers
- Information, instruction, training and supervision that is reasonable necessary to ensure that each
  worker is safe from injury and risks to health
- A commitment to consult and co-operate with workers in all matters relating to health and safety in the workplace.
- A commitment to continually improve our performance through effective safety management.
- Keep abreast of best practices in HSE Management and ensure compliances with applicable legal and
  other requirements as a minimum standard of performance.
- Foster a positive culture towards leading HSE practices through commitment and accountability of employer and employees.
- Provide adequate and appropriate resources to implement the HSE Policy with an aim to eliminate the causes of accidents from our workplaces.
- Apply the principles of sustainable development and use zero risk-based approach in the planning and operation of our projects by seeking ways to eliminate accidents, injury and illness, reduce the use of energy and minimize material wastage to prevent pollution during project operations.
- Evaluate system performance for continual improvement in accordance with the requirement of ISO 45001: 2018.
- Ensure that employees and sub-contractors have received appropriate training and are competent to carry out their duties and responsibilities.
- Consult and involve employees, sub-contractors and suppliers to secure their commitment to the
  policy and its implementation.

#### Application of this policy:

We seek the co-operation of all workers, customers and other persons. We encourage suggestions for realising our health and safety objectives to create a safe working environment with zero-accident rate. This policy applies to all business operations and functions, including those situations where workers are required to work off-site.

Salalah 27-01-2019

CHIEF EXECUTIVE OFFICER

#### Purpose:-

# QUALITY ASSURANCE AND QUALITY CONTROL (QA/QC) MATERIALS LABORATORY PROFILE (TESTING & INSPECTION SERVICES)

- Introduction
- Vision & Mission Statements
- HSE Policy, HSE Objectives
- Quality policy, Quality Objectives
- Contact details and Location map
- Laboratory Manual of Test Procedures
- Photographs & Material Testing at Laboratory and sites

## Introduction

The importance of accurate testing cannot be overemphasized. The cost of materials and the construction involved in a project represents many thousands of Omani Riyals and the entire investment can be jeopardized if the quality of materials and the executions are not verified and corrected. In order to ensure quality of works a full-fledged, well equipped In house Laboratory is necessary.

Hence, we are delighted to present the profile of our Laboratory in Salalah, Sultanate of Oman. The Shanfari & Partners Co LLC, one of the leading construction companies in Dhofar region was established in 1960. Shanfari & Partners laboratory conducts its activities in a manner, which demonstrates technical competence and reliability and in return provides its Clients with cost effective, quality, and on-time services. The Management and the Technical Team of Shanfari & Partners have thoroughly reviewed the levels of requirements to render quality services and thus have developed the necessary infrastructure to offer a complete range of services and have further proposed to develop the company capabilities in a progressive manner.

Our laboratory deserves your confident decision to have it as your preferred Partner in your Testing and Inspection Services due to the following points:

- Very comprehensive laboratory with diverse specializations in Civil Testing, such as all kind of Asphalt works,
   Concrete works, Soil and Aggregate tests.
- Qualified and experienced testing and inspection professionals who have been working in many diverse industrial
  applications for numerous years in various Projects under Government of Sultanate of Oman and private sectors in
  the region.
- International ready-mix Co LLC, The sister company and leading concrete supplier in Salalah and suburbs with various of Grades and other cement products, is accredited and certified as operating in accordance with ISO 9001:2015 and all above qualities are being tested, monitored through our laboratory on and off-site.

# Vision

An Integrated Approach to National Development

# Mission

Conduct its activities in a mode which demonstrates technical competence and trustworthiness while continuously improving and providing a cost-effective, well-timed service for the Clients.

# Laboratory Manual

This manual has been prepared to present the standardized test procedures for checking materials for conformance with Ministry of Transportation specifications, Sultanate of Oman. This is intended to be used in our Central Materials Laboratory and our site Laboratories for guidance, reference, and instruction.

This manual has the current versions of our laboratory test procedures according to AASHTO, ASTM, BS, Concrete Manual ACI and Asphalt Manual MS-2 procedures incorporate with Oman Design Highway Manual November 2017. Every effort has been made to make up to date this manual complete and accurate.

### The objective of this manual is to:

- 1. Measure a property that is of importance to performance in service.
- 2. Make the test as simple and straightforward as possible.
- 3. Reduce to a reasonable minimum the elapsed time necessary for completing the test.

### The manual is divided into four sections;

- 1. SOILS SECTION
- 2. AGGREGATE SECTION
- 3. BITUMINOUS SECTION
- 4. CONCRETE SECTION

#### SHARIKAT FANNIYA OMANIYA

# History

Sharikat Fanniya Omaniya LLC, was formed in 1972 jointly with African & Eastern Trading Co. of U.K.

Popularly known as SFO, which means 'The Technical Company of Oman", our popular logo SFO also envisioned service for Oman. In line with this vision, SFO specialized in providing air-conditioning equipment and services to valued clients at all levels including several prestigious sites like The Palaces, Ministerial Buildings, Banks, Hotels and Commercial Establishments.

At the same time in response to the markets need, SFO started trading activities with well knownconsumer products such as Rainbow milk, Eveready batteries, Algor domestic appliances, Belling kitchen equipment and other world renowned brands.

In 1978, the African and Eastern shares in SFO were bought by Omani Partners, thus SFO is now a 100% Omani Company.

### Management

OurManagement is driven by values and marshalled by effective leadership. Sound management policy keeps us abreast in addressing the unexpected and producing mercurial results.

The Managing Directors of the Company are: -

- H.E. Said Ahmed Said Bin Al Shanfari Chairman
- Shaikh Saeed Abdul Aziz Sabah Al Rawas Managing Director
- •Shaikh Ahmed Abdullah Mahfoodh Al Shaikh Managing Director

# **DIVISIONS**

SHARIKAT FANNIYA OMANIYA LLC. is an Excellent Grade Contracting Firm with 4 major Operational Divisions, viz.

- 1) Electro-Mechanical Contracting Division.
- 2) Air Conditioning Contracting Division.
- 3) Trading / Merchandising Division.
- 4) Transmission & Distribution Division

Each Division is headed by highly qualified professional Managers, assisted by experienced Engineers in respective fields.

### TECHNICAL SERVICE PROVIDER

SHARIKAT FANNIYA OMANIYA [SFO] is a leading contracting company undertaking the electrical and electrical transmission and MEP works of numerous infrastructure and superstructure projects of various functions and sizes.

SFO provides services and solutions by applying the latest state of the art technologies, particularly in electrification.

SFO covers the entire range of electrical engineering solutions of every size, such as low, medium and high tension, energy management and distribution, measuring and control technology, instrumentation, integrated security and building management. SFO covers the entire spectrum of air, climate and energy solutions, including HVAC cold and heat storage, piping, fire-extinguishing technology and mechanical process installations.

For the industrial sector, the focus of SFO is on power plants, and SFO manages technical facility services like operation & maintenance and repair of multivendor equipment's in intelligent residences, offices, industrial facilities & power plants, SFO is one of the strongest and leading companies of the Southern Oman in electrical contracting and MEP works. With the ample experiences and the state of the art technologies, enables SFO to optimize services and perform a leadership role in OMAN and the continually growing by applying innovative, skilled engineered and cost effective solutions. With years of experience and innovative solutions, as a technical service provider, SFO has successfully completed numerous type of buildings such as housing complexes, office complexes, educational facilities, commercial facilities, healthcare centers, shopping malls, hotels, tourism and entertainment facilities, social facilities, industrial facilities, rural electrification, designing, procurement, installation, testing and commissioning of Grid stations and transmission lines up to 132Kv. SFO is ISO:2008 certified, Excellent Grade Contractor pertaining to Engineering, Procurement and Construction of Power Transmission & Distribution Projects.

#### **STRATEGY**

As an innovative company with increasing value, our main strategy is to have a customer oriented approach while providing MEP services for high-quality projects with our long year experiences.

While expanding to new markets, we are aiming to be the MEP contractor of the important projects by maintaining our high-quality and reputation, to be looking forward to establishing partnerships with global players in the sector and to be carrying out the sustainability with risk and cost control.

The Board of Directors and Senior Management are constantly monitoring activities according to our strategy.

During the periodical and frequent management meetings, performance of the company is kept under control and new targets and strategies are being determined, if necessary.

Our target plan for next five years:

- Expand our operations to new markets
- Become one of the key player in entire Oman
- Involve in infrastructure projects.
- Strengthen our strong capital structure
- Grow at least 15% while maximizing our profitability in the new projects.
- Strengthen our activities in renewable energy sector.
- Enhance our capacity to design, install, testing and commissioning of Grid station and transmission lines upto 400kV.
- Continue to implement corporate governance principle.

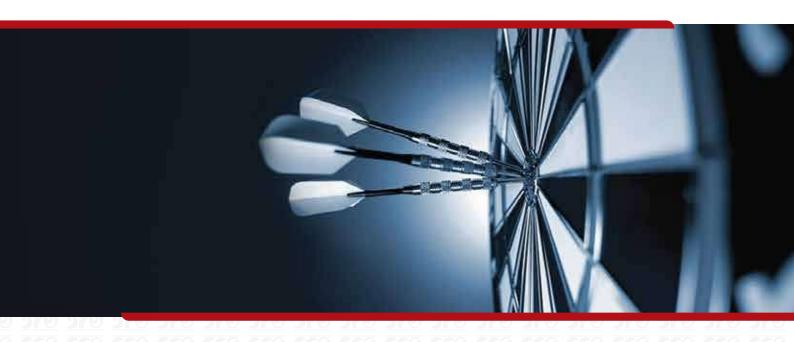

# **VISION**

To become a preferred Contractor in Engineering and Construction of Transmission & Distribution Power Projects in the Sultanate of Oman.

To instill confidence in all stake holders by professionally managing every Project in terms of reliability, timely completion, cost effective and quality.

## QUALITY, ENVIRONMENTAL AND OCCUPATIONAL HEALTH AND SAFETY POLICY

- Taking into consideration the product and service safety with regard to employees, customers and users.
- Complying with local and international laws, regulations and sector requirements in every process of work.
- Identifying the activities in regard to the environmental pollution prevention and waste management, and continually improve the environmental performance following the effectiveness of the relevant applications.
- -Taking necessary corrective and preventive actions for safety and environmental related non-conformities, accidents and occupational illness and environmental incidents.
- Measuring the performance of employees and processes with internal audits in order to maintain the effectiveness of our quality, environmental, occupational health & safety management systems and to ensure its permanence.
- Ensuring that the targets of quality, environmental, occupational health and safety management Systems are clearly communicated to all of our employees.

The suitability, effectiveness and efficiency of the entire "Quality, Environmental, Occupational Health and Safety Management Systems" are periodically reviewed by the top management and updated as part of our continual improvement process.

S. SRIHAR

Alllan

Chief Executive Officer

## SOCIAL RESPONSIBILITY POLICY

As SFO, we consider provision of values over to the society in which we exist, through the standpoint that has been brought forth by being one of the important establishments.

- We consider the work safety as our most important priority and we respect fundamental right and freedom of all of our employees. We provide healthy and secure working conditions for our employees.
- We accommodate social, environmental, ethical and humane issues in our focus point.
- We maintain all our activities and relations based on the honesty and considering interests of all entourage.
- We include all of our shareholders, employees, customers, business partners, suppliers and non-governmental organizations and all the individuals of the society, who live and work in our establishment.
- We act conscious of our responsibility to the environment.
- We take care of using the energy resources in the most efficient way.
- We conduct all of our practices in the way that they protect the environment and which continuously improves our environmentally friendly performance.
- We consider observing national and international standards with respect to the environment as part of our social responsibility perception.
- We fulfill all of our tax obligations to the government by adhering to the principles of accuracy and transparency.
- We share our knowledge and experience with the society.
- We furnish equality of opportunity for each and every employee of ours.
- We attach importance to the freedom for expression with regards to the communication and all of thoughts and points of view for the decision process.

# Our Corporate Social Responsibility Approach:

- As SFO, we consider provision of values over to the society in which we exist, through the standpoint that has been brought forth by being one of the important establishments in Oman.
- In this context, we produce projects, which would create added value in topics that envelops communal, social, environmental, historical and educational fields as being related with technical contractor business where we have knowledge, experience and specialty.

S SRIHAR

Alllan

Chief Executive Officer

### **CODE OF ETHICS POLICY**

- Conduct our business in compliance with any and all applicable local laws.
- Build our business on ethical principles.
- Endeavour to earn a reputation for integrity, competence and excellence.
- Introduce a transparent disclosure policy for the company's operations.
- Protect and encourage fair competition.
- Have due regard for labor law including health and safety and support the fair employment of young, women and physically challenged individuals.
- Prevent any form of corruption.
- Consider integrity as our core values in all our business processes and business relations.
- Put our efforts towards making business ethics constitute the very fundamental of our corporate culture.
- Provide our employees with the awareness, rules and practices to ensure avoidance of conflicts of interests.
- Maintain equal distance to any and all public offices and authorities, administrative entities and political parties without any expectations of interest through the course of our operations and actions.
- Support endeavors contributing to economic and social development.
- Prohibit our employees from accepting and giving away presents which may influence their or counter party's impartial decision making and conduct.
- Develop practices to disseminate above principles, concepts and practices to all parties within our sphere of influence, including our business partners, contractors and suppliers.

S. SRIHAR

Alllana

Chief Executive Officer

## **ELECTRO-MECHANICAL CONTRACTING DIVISION**

Electro-mechanical Contracting Division is the major Division in SFO and is operating for more than 20 years. This Division undertakes contracts for all types of Electrical, Mechanical, Plumbing / Sanitary jobs including installation, operation and maintenance of such projects.

### Some of the Activities & Services include:

- Construction of Turnkey Projects covering Power Stations including SCADA Control System.
- Operation & Maintenance of Power Stations.
- Electrification of multi-storey building structures.
- Overhead Electrical power distribution networks upto 132 KV.
- Underground Electrical cable laying works, HV & LV.
- Construction of Sub-Stations.
- Landscape lighting and controls.
- Undertaking road lighting contracts including traffic signals.
- Design, Supply & Installation of Reverse Osmosis Plants & Desalination Plants.
- Operation & maintenance of water treatment plants.
- Electro-mechanical works for Pumping stations.
- Supply & installation of irrigation systems.
- Installation of water distribution networks and plumbing / sanitary and drainage system.

#### AIR CONDITIONING CONTRACTING DIVISION

Air Conditioning Division was added as a separate Division within SFO. This Division's activities include the following:

- Providing air-conditioning equipment.
- Installation of all types of Central Air Conditioning & Controls, including ducting & ventilation.
- Installation of Split & Window Air Conditioners.
- Providing air conditioning related services to valued clients at all levels including several prestigious sites like The Palaces, Ministerial Buildings, Banks, Hotels and Commercial Establishments.
- Regular maintenance of air-conditioning of large and small building & villas on contract basis.

#### TRANSMISSION & DISTRIBUTION DIVISION, MUSCAT

The activities and services of this Division includes:

- Construction & Maintenance of High Voltage Network of Transmission & Distribution Systems as Engineering, Procurement & Construction Contractors (EPC), including High Voltage Grid Sub-stations., Primary sub-stations, Cabling and overhead lines.
- Civil works associated with Sub-Stations and Transmission Lines.
- Trading of High Voltage Electrical Equipment.

#### TRADING / MERCHANDISING DIVISION

• Trading Division activities include distribution of well-known consumer products such as milk, tea, detergents, food products, electrical appliances, kitchen equipment and domestic appliances of world renowned brands.

We are proud Merchandiser & Sole Distributors in Salalah for:

- Rainbow, Omela Milk and Milk Products.
- Eveready / Energizer Batteries and Lighting Products.
- Tata & Kannan Devan Tea.
- Bahar Soap & Detergent Products.
- Nabil Biscuits & related Products.
- Al Safa Palm Oil & Sahi Refined Vegetable Oil & Ghee Products.
- Papillon Facial Tissues & Al Jamil Diapers.
- Dema Washing Powder and Savo Dish Washing Liquid.
- Canned Tin Products.

We have further plans for expansion and add many more branded products to our list.

#### **ACTIVITIES OF TRADING DIVISION**

- Since the year 1972, SFO is engaged in the distribution of Consumer Products and presently represent the following well known national and international brands inSouthern region of Sultanate of Oman:
- Friesland Campina , Holland :- Rainbow, Omela Milk and Milk Products
- National Biscuit Co Ltd, Muscat: Nabil Biscuits, snacks.
- Tata Global Beverages Ltd. :- Tata and Kanan Devan Tea
- Omani Vegetable Oils & Derivatives Co LLC. :- Al Safa Palm Oil and Sahi Soft Oil
- P.K. Overseas Ltd. Delhi, India :- Al Habib, Mansa, India Salam Rice
- Al Lub Paper Products, Muscat: Mazoon Maxi rolls and Facial Tissues, Hotage Table Salt
- Energizer Middle East & Africa Ltd:- Energizer, Eveready Batteries and Lighting Products
- National Detergent Co SAOG, Muscat: Bahar, No.1, Site Detergent and Dish Wash Liquids

-SFO's Trading Division has a track record of constant growth and enjoys major market share in their product ranges.

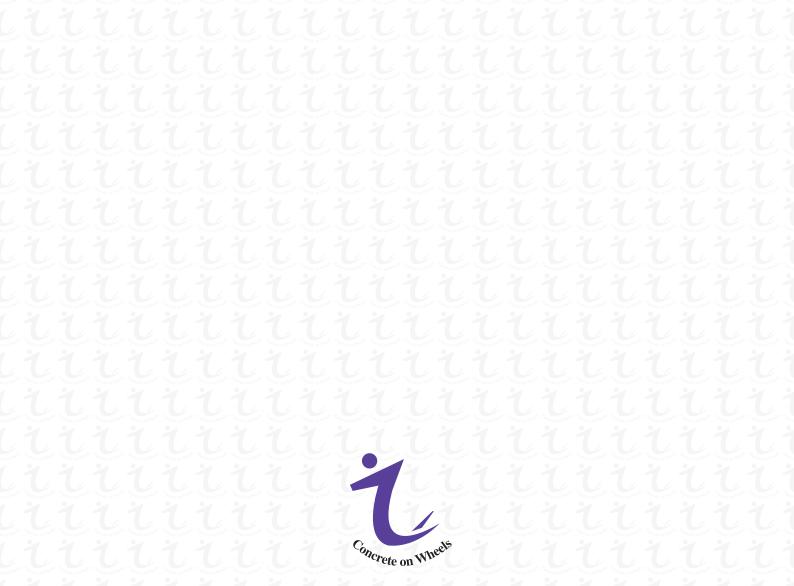

### الشــركة الدولية للخرسانة الجاهزة ش.م.م International Readymix L.L.C

www.readymixoman.com

#### INTERNATIONAL READYMIX LLC.

- INTERNATIONAL READYMIX CO. LLC. (IRM) is a part of Shanfari & Partners Co. LLC. a professionally managed organization carving a niche in the business world. Our Parent Company Shanfari & Partners Co. LLC was established in 1960. Since then, the Company has formulated the basics and principles required for future development and promotion. Shanfari & Partners Company LLC played an important role during the period of renaissance in infrastructure development in Oman. It has expanded its activities to become one of the largest and most distinguished Companies in the Sultanate of Oman, encompassing several business sectors: Civil & Construction Contracting, Manufacturing, Transport, Tourism Development, as well as import and export of petroleum products.
- We, IRM are proud to be the leading manufacturers and supplier of mixed concrete in the Sultanate and bolstering the construction fraternity across the Country to new heights.
- Besides, we are recognized for our values of integrity, fair, transparent and ethical dealings. We are proud to be associated with the leading Organizations and Builders, Consultants, Flat Promoters and Developers of Engineering solutions. With the cutting-edge technology IRM spreads out to six plants with a total capacity of more than 450 cubic meters per hour, supported by a modern fleet of Batching Plants, Ice & Chiller Plants, Transit Mixers, Concrete Pumps, Sand Washing Machine, Crusher Plants with Own Quarry and Transport System.

- Quality is the paradigm of IRM. We are quality conscious and ensure the product undergoes failure testing in design and production and meet global standards of BS and ASTM. IRM has fully owned Laboratory facilities.
- The Company owns a modern stone crushing and asphalt-producing plant. These contribute to the requirements for international standard concrete and asphalt for company projects, and to meet the demand from other companies engaged in such works.
- As a part of our product diversification and expansion programme, the Management has decided to establish a Factory for production and supply of Concrete Blocks, Interlock Tiles, Kerb Stones, etc. In addition, under His Majesty Sultan Qaboos Bin Said's vision, Dhofar Region will be undergoing a rapid development programme by constructing new Airport, Sea Port, Expansion of Raysut Industrial Area, Expansion of Free Trade Zone, Rural Electrification and Construction of Mega Power Stations etc. Further we have a very sound customer base for concrete for which there is a heavy demand for hollow blocks. Interlock tiles and kerb stones shall cater to the need for road developments. Also we would like to add that we have a clear edge on these products than other competitors because of our service and quality of ready-mix concrete.

#### Our Mission

With every delivery, our mission is your success.

IRM aims to be the most respected and successfully operated company in our industry, creating value for all of our stakeholders.

Our Mission is to provide quality products and services which consistently meet our customers' expectations; to be responsible stewards with respect to the safety and environmental impact of our operations and products; and to earn superior returns for our shareholders.

We recognize that success in all of our activities is related directly to the talents, dedication and performance of our employees throughout the Company.

Achieving our mission involves a commitment to the following:

- Innovative solutions for our customers.
- Employees with a passion for performance.
- An open and collaborative corporate culture.
- A forward-looking organization.
- A culture that promotes sustainable development.
- Long-term financial performance
- Provide an enabling work culture to attract and nurture the best talent and create a winning team.
- Make health, safety and happiness of our employees an abiding consideration in all our actions.
- Participate in worthwhile social causes in the communities in which we operate.

#### **OUR VISION**

- To participate in building tomorrow's Oman by being the leading ready-mix concrete and related construction materials and services company.
- To be universally respected and admired for customer service, operational excellence, consistent quality and ethical practices.
- To be a responsible corporate citizen by adopting best-in-class health, safety and environment practices.
- To provide end-to-end concrete solutions and ensure consistent quality, timely delivery and efficient pre and post sales support to delight customers.
- To set new standards in operational excellence through efficient resource management resulting in profitability and attractive shareholder returns.
- To partner with vendors to strengthen the supply chain and ensure quality materials and infrastructure.

#### Leadership

Creating and contributing to an environment in which our people can excel through a management style which is participative, encouraging, demanding, and supportive.

#### Respect

Ensuring the impact and integrity of our operations and actions on employees, customers, communities and environment in which we operate, meet both the spirit and letter of the law and community expectations.

#### **Focus**

Making critical choices on priorities, making timely, insightful fact-based decisions, and being determined to pick the right things and do them well.

#### **Performance**

Getting on with the job, setting challenging goals and standards, measuring results, providing honest feedback on individual contributions and rewarding achievement.

#### **Persistence**

Striving to be the best at what we do, being relentless in our pursuit of improvement and of increasing targets, never being satisfied with the status quo.

#### A LETTER FROM BOARD OF DIRECTORS

For over 8 years, IRM has been building the Southern Oman Coast. We are centrally located in SALALAH OMAN, and have SUPPLIED CONCRERTE FOR many highway and road projects, airport facilities, residential and commercial driveways, power stations, schools and universities, retaining walls, septic and sewage disposal systems, water storm drains and much other civil engineering projects. We work for single homeowners and for some of the largest and most respected businesses, and developers in the area.

To achieve top quality work, IRM uses state-of-the-art equipment and has dedicated, well-trained employees to get the job done. Our modern and well-maintained fleet ranges from excavators, loaders and transportation equipment to the most sophisticated computers and laser-enhanced grading and paving systems. Our offices, shop facilities, quarries, and Ready Mix plants are also modern and share the latest state of the art infrastructure and technologically advanced systems and components.

As a local company, we believe in doing business with local vendors, suppliers and banks and trades people. We also support many civic and non-profit organizations in our community with contributions of many kinds. Just as the local community supports us, we believe it is our responsibility to support them in return.

At IRM we pride ourselves on the quality of our projects to ensure that our product is not just complete but is the best available. We are about quality, pride and knowledge, and will go the extra mile to deliver the best. When you see our big Red striped trucks or the IRM logo you know its quality on the move.

IRM is a local company that cares.

BOARD OF DIRECTORS.

#### WHY IRM IS "SPECIAL"

- $\varsigma$  trategically located Batching Plants.
- $\boldsymbol{L}_{}$  arge fleet of Transit Mixers with the capacity to expand at will.
- ${\bf S} \,$  ufficient concrete Pumps and well trained pumping team.
- On time and prompt Delivery of concrete.
- K xcellent Customer Support before, during and after the concreting.
- ${f E}$  ffective communication system between customers and the Company.
- $\, B \,$  etter site management practices during operations at site.

#### IRM CAPABILITIES

- 1. Quality Plants and younger FLEET.
- 2. Technical

At IRM Concrete, ready mixed concrete is produced in its fully automated and computerized concrete batching plants at multiple locations across Dhofar Region. IRM Concrete manufactures and supplies concrete mixes, which are designed in its well-equipped laboratories as per established procedures to comply with various provisions of Oman and

International Standards. IRM Concrete's experienced logistics team works closely with you to ensure that the concrete of requisite quality is delivered on time and in the appropriate quantities.

IRM Concrete considers technical capability as its core competency. Engineers with relevant experience, exposure and educational qualifications are leading the technical department. IRM Technical Team is committed to R&D in concrete technology. Services of renowned concrete technologists are availed regularly for better knowledge creation.

3. Service

Hands on team with international experience in the ready-mixed concrete & pre-cast concrete industry.

Track record of successfully servicing the biggest builders and construction houses in the country.

Educating the customer on the pre pour and post pour by handing over pour guidelines.

#### **QUALITY CONCRETE**

- "Quality Concrete" as a structural building material depends largely on the mix design, the raw materials and the production and delivery methods used. We recognize our clients' needs; have consistent delivery, guaranteed supply, and trustworthy testing. Even low grades of concrete can cause quality problems if supply is inconsistent.
- Optimal mix design does not come only from text books, nor can it be left to field staff. Mix design is a profession and craft based on the latest technical knowledge coupled with real "hands-on" field experience.

A good mix design cannot be "set and left". It must be continually fine tuned based on observation of the physical properties at the site (such as pump-ability, finish-ability, bleed and slump) and statistical analysis of all test results. It is the only way to ensure premium concrete. At all our customer's sites you will find our technicians recording observations and preparing cube tests for curing and analy-sis at our central laboratory. This data is then computer analysed and the results made available to our customers.

Rigorous control of raw material suppliers (such as regular quarry inspections, sleeve analysis tests, inspection of crush-ing equipment and cement mortar tests) is the only sure way to maintain quality raw materials. At IRM we are obsessed with the quality of our raw materials. Our fully qualified laboratory staff pick and choose our raw materials in order to maintain the highest quality standards.

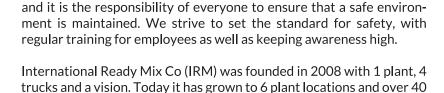

- At our laboratory we are able to perform compressive strength tests, aggregate sleeve analysis, moisture tests and cement mortar tests. All our test results have been indepen-dently verified by local institutes. Our regular concrete compressive strength tests are computer analysed by truck, project, customer and mix design using software specifically developed by the Readymix Group. These results are made available to all our customers.
- So, by controlling the quality of our raw materials, and by never ceasing to optimize our mix design, and by using quality equipment, we can guarantee the result quality concrete.

#### SAFETY

reasonable price.

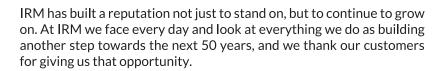

trucks. IRM has the most coverage area of any single concrete company in South of Oman. With its plants strategically located averaging no more than 35to 100 Kilometers apart, IRM can combine its resources

Safety is a top priority among all employees at Ready Mix Concrete,

to handle any job regardless of size.

For almost 8 years putting the customer first and producing a high quality product using the most up to date and modern equipment for a

To be a leader in the ready mixed industry, a producer must have the capability to keep up with a market that rightfully demands a high quality product at a cost-effective price. In our many years serving Salalah, IRM has seen changes in the economy, the environment and our community. Keeping pace with those changes has ultimately provided us with invaluable experience in the market and lasting relationships with customers.

At every level within our organization you will find dedicated, skilled personnel prepared to provide advice and realistic cost-effective solutions. From large general contractors working with critical paths to homeowners pouring a patio, we understand the value of time and the importance of quality

#### Health & Safety

IRM is dedicated to being a world leader in all aspects of its operations, including Health and Safety. IRM has a target of zero injuries and does not accept unsafe working practices.

The health, safety, and well-being of our people are of paramount importance to us and are critical to our ability to conduct our business and we continually monitor our safety progress to ensure that our programs are working as effectively as possible. All employees are expected to ensure zero tolerance of any practices that could result in accidents and ill health, and contribute to ensuring a safe working environment by taking the necessary measures and following the correct practices.

Safety is an integral part of management. Good management ensures safety. A safe and healthy work environment is vital to the success of the Company's business activities. Improvements in Health & Safety performance can be achieved by the combined efforts of Management and employees to develop safe systems and maintain the highest level of awareness.

The Management is aware of the importance of protecting the Company's most precious resource - its employees, and of the necessity to exert every effort in order to safeguard employees' health and safety. Quality cannot be achieved without safety, nor can safety be achieved without quality. Examination of safety procedures is a very effective way to judge an organization's progress.

The Company's Management is responsible for providing sufficient and appropriate means and support to achieve its goals with regard to Health and Safety. It is the duty of the Managers of the Group's companies and business units to ascertain that the Group's Health 86 Safety policy is complied with in accordance with Israeli Health 86 Safety laws and regulations.

#### **QUALITY CONCRETE**

Managers and employees are committed to maintaining safety at work at all times and to putting the safety of themselves, their colleagues, and third parties, at the top of their list of priorities.

Employees are encouraged to direct the Management's attention to any unsafe work conditions or procedures.

Managers should see to it that appropriate safety systems are in place and that suitable safety gear and equipment is provided in order to ensure that the Company's activities are carried out in a safe manner

#### **Safety Essentials**

The vast majority of incidents at work are caused by unsafe behaviour. One of IRM's biggest challenges, is therefore to change habits and encourage people to 'stop and think' before carrying out a task.

Work-related incidents are preventable and it is the right of every employee to go home well and free from injury at the end of each working day. IRM aims to achieve zero lost time incidents in Oman and, although, this is an ambitious target, IRM is confident this can and will be achieved.

In Oman it is estimated that up to 90% of workplace injuries are caused by unsafe behavior. To bring this figure down, IRM has created the following 12 fundamental Safety rules that all employees are expected to commit to, in the interest of themselves and their colleagues:

- 1. Look After Yourself, Look After Each Other Don't let anyone act unsafely, always stop unsafe practices.
- 2. Housekeeping Keep designated access routes and work areas tidy and free from trip/slip hazards.
- 3. Get a grip Hold handrails on stairways and use three points of contact getting into/out of vehicles.
- **4. Personal protective equipment -** Always wear the correct PPE.
- **5. Manual handling -** Use mechanical aids or ask for help to reduce the risks.
- **6. Tools / equipment** Use the right, well maintained tools/equipment for the job. Never make do.
- **7. Driving -** Drive safely, ensure you are authorized and that vehicles/mobile plant are well maintained.
- **8. Safe systems** Follow safe systems of work, site rules, signage and traffic signals.
- **9. Isolation procedures** Never work on live or moving machinery always 'lock out'.
- **10. Working at height** Use appropriate access equipment and fall protection.
- 11. Confined spaces Obtain a permit to work and always follow the safety requirements.
- **12. Incident/hazard alert cards** Report all incidents/hazards immediately, and we strive towards achieving our goal of zero injuries for life.

#### **ENVIRONMENTAL POLICY**

As a leading Supplier of concrete and concrete raw materials, IRM understands that our business activities and products do have an environmental impact – what we seek is for this impact to be positive.

Our philosophy is that our business activities and products should have a NET POSITIVE EFFECT on our environment.

Our commitment to the responsible management of our environment and the prevention of pollution is underpinned by this philosophy which is integral to the success of our business.

To implement this policy and maintain our commitment, IRM will:

- Establish and maintain an Environmental Management System with measurable objectives and targets and defined responsibilities and accountabilities.
- Develop environmental management plans prior to any activity that has the potential to negatively impact the environment.
- Rigorously employ methodologies to identify environmental hazards, assess their risks and control the risks to as low as reasonably practicable.
- Develop and maintain environmental contingency response plans.
- Provide the resources, supervision, information and training to ensure our people can perform their work in an environmentally responsible manner.
- Facilitate continuous improvement by reporting and investigating all environmental incidents, including near misses, in order to maximize learning and prevent similar occurrences in future.
- Achieve a level of environmental performance that as a minimum achieves that required for legislative and regulatory compliance.
- Continually reduce our environmental footprint while delivering value for our employees, our clients and our shareholders, and
- Foster a culture that encourages and rewards sound environmental practices and ongoing consultation on environmental management.

IRM recognizes that the success of the Environmental Policy relies on the total commitment and cooperation of our people to achieve a NET POSITIVE EFFECT.

S. SRIHAR

Chief Executive Officer

#### **HEALTH & SAFETY POLICY**

IRM considers the health and safety of its employees to be of primary importance. IRM accepts the challenges of its operating environment and believes that the creation of a responsible health and safety culture in all its operations is integral to long term success.

It is IRM policy to strive to minimize health and safety risks in all its activities and to take an active role in raising the health and safety awareness and responsibility of employee, suppliers and customers.

For this Policy to be implemented IRM and all its employees, suppliers and contractors will:

- Conform to all relevant health and safety legislation and any other requirements.
- Provide a safe work environment for all staff, contractors and visitors.
- Provide the resources, supervision, information and training to ensure our employees can work safely.
- Ensure that all its operating businesses have appropriate policies, procedures and facilities so that such standards can be achieved.
- Integrate health and safety into all IRM management and reporting systems to ensure safety is at the forefront of our operations.
- Apply the principles of continuous improvement to health and safety performance through measurable objectives and targets aimed at the elimination of work related injury and illness.
- Promote health and safety awareness and responsibility among all employees, suppliers and customers.
- Recognize the required commitment to the communication and consultation approach with all employees.
- Cooperate with all relevant health and safety agencies.
- Conduct regular risk assessments, reviews of conformance to requirements and assessments of achievement of objectives at Board level.
- Establish a IRM Rehabilitation & Return to Work Policy and comply to such policy in the event of a work related injury, and
- Be available to interested parties on all matters of health and safety.

Compliance with this Policy is a responsibility of all IRM's employees and contractors.

S SRIHAR

Chief Executive Officer

#### **QUALITY POLICY**

IRM aims to be the leading supplier of concrete and concrete raw materials in its markets by delivering quality products at competitive prices with professional service.

Quality is fundamental to this aim and is a guiding principal in everything we do: QUALITY IS OUR STRENGTH.

At IRM our objective is to maintain our customers' trust by delivering the best quality products which meet their expectations and set us apart in the market. We will also deliver the best possible service experience to our customers by exceeding their expectations and keeping our promises.

We achieve this through our exceptional people, excellent equipment, use of only the very best raw materials and robust systems that are continuously improved.

To implement this policy and maintain our commitment, IRM will:

- Establish, document, implement and maintain a Quality Management System.
- Provide the infrastructure and resources needed for quality, including the finances, equipment, materials, training, skills and experience of our people.
- Define and communicate quality responsibilities and authorities.
- Understand customer requirements, plan their realization and measure success in meeting them.
- Maintain and improve both internal and external communication processes so that customers and employees receive responses to their needs within 24 hours.
- Continually review our quality objectives and the strategies that underpin them.
- Plan and conduct regular audits and management reviews of the Quality Management System and operating practices to ensure ongoing suitability, adequacy, effectiveness and continuous improvement.
- Meet or exceed all legal and contractual obligations.
- Ensure quality issues and non-conformances are resolved through effective and expeditious corrective and preventive actions.
- Foster a culture of open and honest appraisal and communication of audit results and performance data, including our successes, and
- Require and encourage everyone at IRM to enhance our reputation as a customer-focused company that consistently delivers the highest quality by implementing this policy.

IRM recognizes that building value for its employees, customers and shareholders is underpinning by the quality of its products and service. Everyone at IRM is totally committed and will cooperate to achieve this objective.
